INTERNSHIP OBJECTIVE

I am a Computer Science student majoring in Artificial Intelligence at Universiti Teknikal Malaysia Melaka (UTeM), seeking an internship opportunity in the IT field. I have gained experience in Python, Flask, web development, databases, and computer vision through my academic projects. I hope to apply my knowledge in a real working environment, improve my technical skills, and learn from experienced professionals.

EDUCATION

Universiti Teknikal Malaysia Melaka (UTeM) — 2024 — Present

Bachelor of Computer Science (Artificial Intelligence)

Politeknik Sultan Abdul Halim Mu'adzam Shah (Polimas)

Teknologi Maklumat (Digital) — Diploma — Dec 2020 — Sep 2024

Kolej Komuniti Bandar Darul Aman — Jan 2018 — Apr 2020

Teknologi Maklumat — Sijil

TECHNICAL SKILLS

Programming: Python, Java, C++, C#, VB, JavaScript
Web: HTML, CSS, Flask, ASP.NET, REST API
Database: MySQL, SQLite, SQL Server, Firebase
AI / CV: YOLOv8, OpenCV, Machine Learning
Tools: VS Code, GitHub, MATLAB, Anaconda

LANGUAGES

Mandarin: Proficient
Bahasa Malaysia: Conversational
English: Conversational
Hokkien: Conversational

SOFT SKILLS

Teamwork • Responsibility • Communication • Problem Solving
Fast Learner • Time Management • Willing to Learn

WORK EXPERIENCE

Gano Excel Industries Sdn. Bhd. — Aug 2023 - Jan 2024

Web Developer Intern

- Updated multilingual website content, supported testing and page checking, and helped maintain layout consistency across language versions.

UIDM, POLIMAS — 2019 - 2020

Practical Student / Industrial Training

- Assisted in video editing, camera operation, event recordings, hall activities, and audio-visual setup for official events.

LSH Lean Shen Hardware Sdn. Bhd. — 2020 - 2021

Store Assistant (Part-Time)

- Supported stock arrangement, goods receiving, inventory checking, item organization, store cleanliness, and customer service.

Pasaraya Yawata Jitra — 2017 - 2018

Part-Time Assistant

- Handled basic cashier tasks, arranged products on shelves, maintained store cleanliness, and helped customers during daily operations.

KEY PROJECTS

SecureVision - CCTV-Based AI Intrusion Detection
Python, Flask, YOLOv8, FaceNet, MediaPipe, SQLite
Built a CCTV system to detect people and recognize faces. Added restricted-zone alerts, Telegram/email notifications, and pages for monitoring, attendance and intrusion records.

AI-Based Ikan Puyu Monitoring System
MySQL, Database Design
Designed database tables for tanks, sensors, readings, actuators, and fish growth prediction records for an AI monitoring project.

Student Performance Management System
C++, SQL
Created a system to manage student records, calculate scores, validate inputs, and search details using matric numbers.

E-NOTE BSK System (Mobile App)
Java, Android, PDF Editor
Developed a note-taking app with PDF annotation, user login, PDF sharing, and basic note management features.

Android Kopitiam Food Ordering App
Java, XML, Android Studio
Created an Android app interface for browsing food and drink items and placing orders as a course project.
